This document is copyright protected and any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful.

ISO/IEC 27001:2022

Issue 5

The Information Security Management System (ISMS) of China Telecom Europe's Network Construction and Maintenance Department supporting telecommunications and network services delivered as part of a global Digital Silk Road. These services, hosted in Points of Presence (POPs) for Private Leased Line and Ethernet Private Lines, Optical Transmission Networks and the provision of MPLS/IP global internet and VPN services, voice, and secured hybrid cloud solutions, form China Telecom Europe's Voice, Data, IP and supporting portfolio of high availability and secure customer solutions.

The business processes providing these customer solutions are hosted from China Telecom Europe operating sites in London, Paris and Frankfurt and at third party POPs in the UK, France and Germany.

The scope includes the following:

- All CTE network operations staff, including engineers working at office locations in London and working at several Points of Presence (POPs) in third party data centres in UK.
- All critical network operations processes, business systems, customer data, critical information and applications used to support carrier-based operations and client services provided on the Europe to China global Digital Silk Road.
- The key ISMS supporting functions provided by Legal/Compliance, Human Resources, Internal IT and office management.
- All CTE provided end user services and devices provided to Network Operations for the purpose of managing all client services on the CN2 network.

Assessed in accordance with the SoA version 2.0 dated January 2024
